NS CLEAR

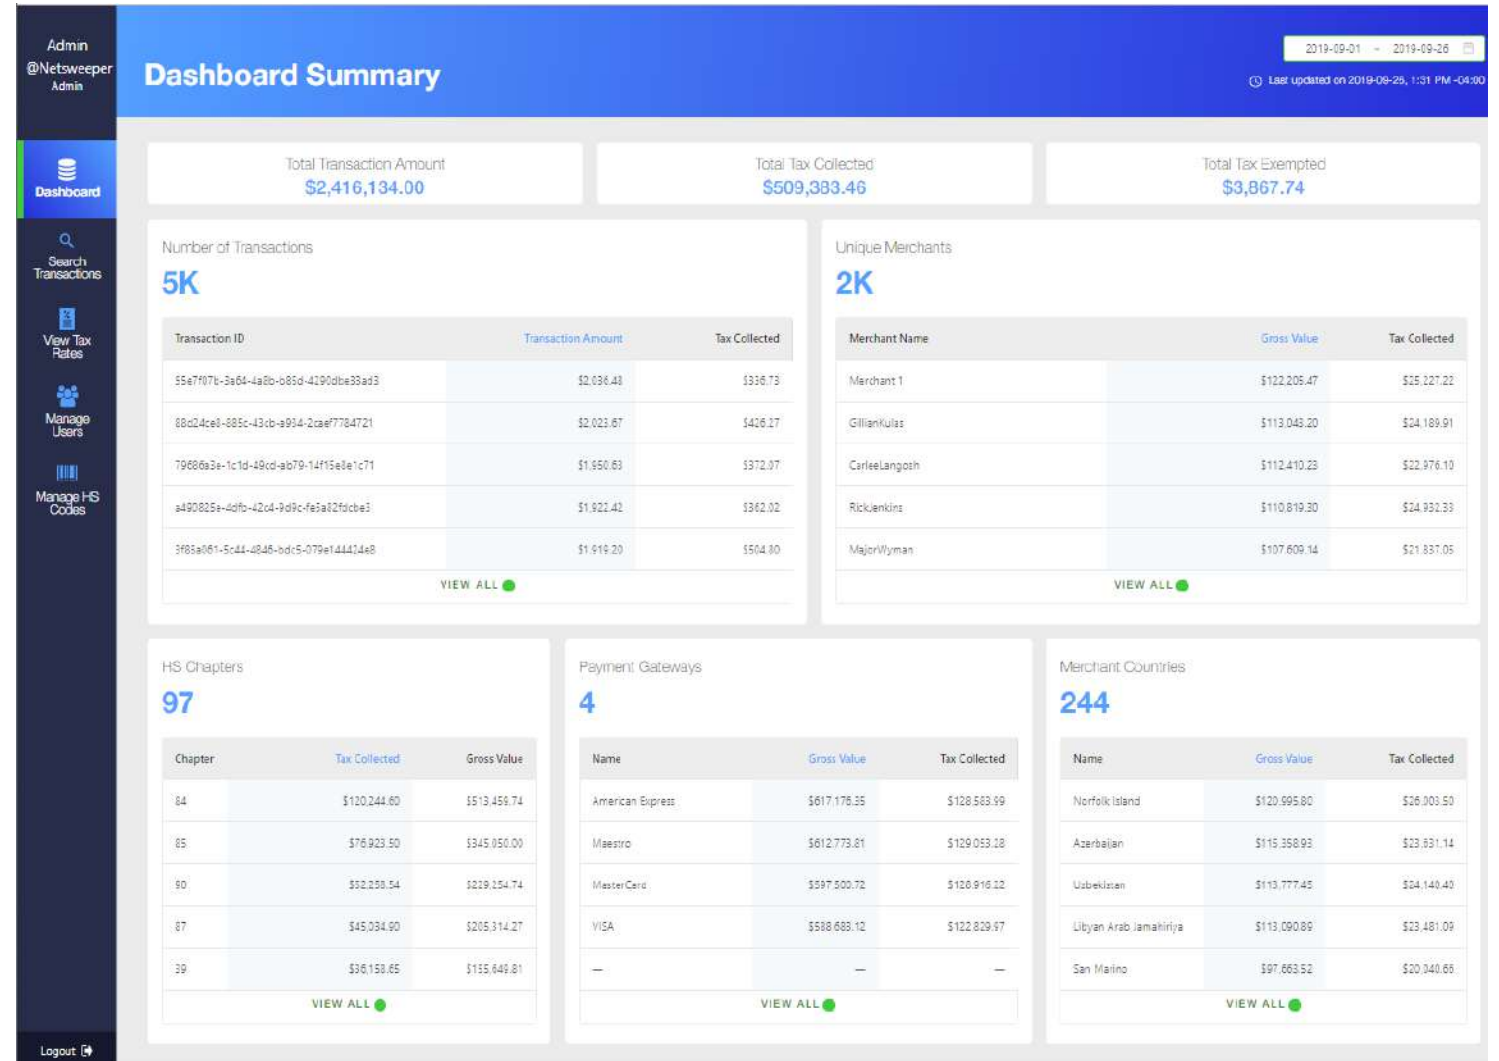

E-Commerce VAT
Collection Solution

With NS Clear, compliance by local & international e-commerce merchants is easy because it does not require them to change their current payment gateway / processor which could negatively impact their preferred business model (financial & operational) – it is a simple, practical, & elegant tax collection solution

NS Clear (NSC) E-Commerce VAT Collection System

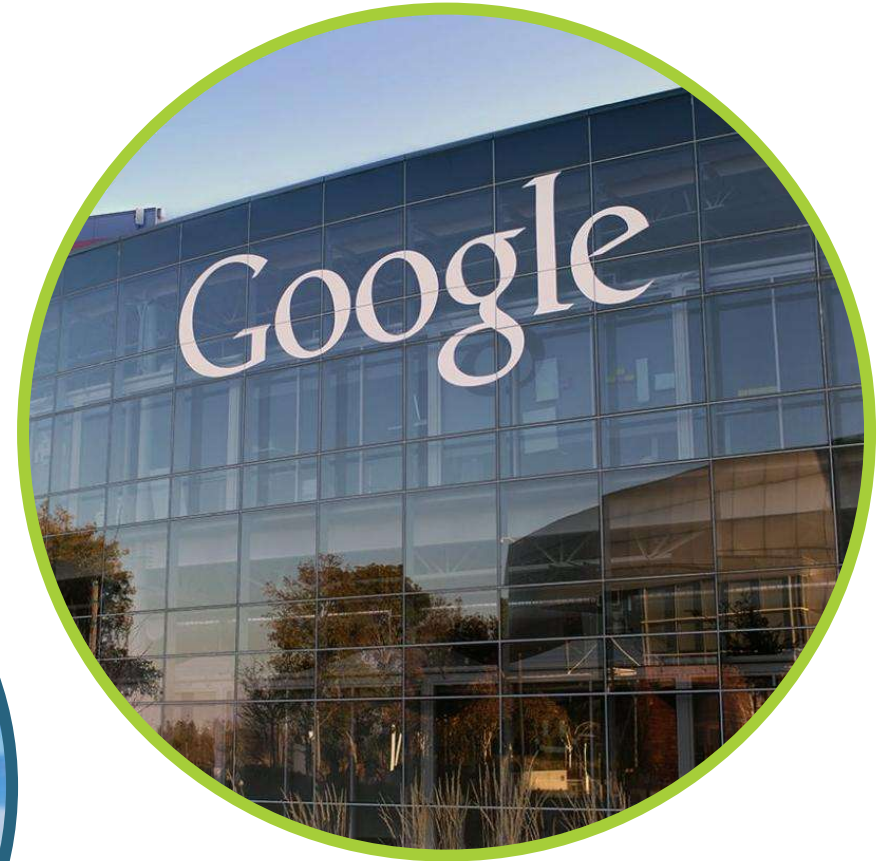

Countrywide Enforcement - Use Case

- Netsweeper blocks all Unregulated Online Gambling sites in one day and keeps blocking every day.
- In 2019 and 2020, the Indonesian government passed laws & regulations requiring all online service providers (electronic system operators), foreign and domestic, to register with the government website.
- Some companies were initially against registering as an electronic system operator as required by law.
- Successfully enforced its digital sovereignty in 2022 with Netsweeper
- 195 Netsweeper installs to filter 200 million Internet users

Countrywide Enforcement - Use Case

- Facebook & Google were reluctant, but finally registered with the government the day before the 2022 deadline.
- PayPal, Steam and a few others were initially blocked, only to be lifted after they complied.
- This demonstrates the power of having a country-wide enforcement tool.

Ultimate Beneficial Owner (UBO) Program for Online Service Providers

- Using Netsweeper technology, Indonesia has also introduced a **highly effective Ultimate Beneficial Ownership (UBO) program for all Online/ Digital Service Providers** to register with the regulator, which is now close to generating nearly USD \$1 Billion.
- The Indonesian government issued Minister of Communication and Informatics (MOCI) Regulation No. 5 of 2020 on Private Electronic System Operators (ESO), amended by MOCI Regulation No. 10 of 2021 ("MOCI Regulation 5") which **requires all foreign online service providers (called ESO) that offer services in Indonesia to register** with the OSS (Online Single Submission) system (<https://oss.go.id/>).

Enforce/Recover Major Corporation Tax (Possible retro)

Headquarters operations of foreign companies

The headquarters operations of foreign enterprises taxation regime is subject to prior approval by the tax authorities.

If enacted, headquarters operations of foreign enterprises and international groups will be granted a favourable tax status in the Republic of Congo. For those that qualify, CIT is charged on a deemed profit equivalent to a prescribed percentage of headquarters expenses, the percentage of which is currently unknown.

To qualify, the headquarters must be registered under the form of a public limited company or branch and must act solely for the benefit of the group in the area of management, control, or coordination.

Global flat taxation

The global flat tax is at 5% (of the annual turnover) or 8% (of the annual margin) and applies in lieu of the standard CIT rate. It is calculated on the annual turnover of enterprises taxable under the flat rate regime, whose turnover does not exceed XAF 100 million.

Local income taxes

- See Business tax in the [Other taxes](#) section.

National Security, Cybersecurity & Child Protection Benefits

Netsweeper's core area of expertise also includes the country-wide regulation of illegal internet content such as :

- **Terrorism / Extremism (National Security)**
- **Prevention of Online Scams & Fraud (Consumer Protection)**
- **Country-Wide Prevention of Large-Scale Phishing / Ransomware Attacks (Cybersecurity)**
- **Harmful or Inappropriate Content for Children (Child Protection)**
- **Child Sexual Abuse Material (CSAM) (Child Protection)**

Apart from the guaranteed revenue that can be both recovered and generated from Netsweeper's solutions, the pro-active safeguarding of children, protection from online scams & fraud, as well as effective measures taken to combat terrorism are politically friendly and will ensure positive optics for your administration by the Kenyan citizenry.

FATF Grey List Loss Results for DR Congo

Based on the IMF Working Paper *The Impact of Gray-Listing on Capital Flows: An Analysis Using Machine Learning*, DR Congo could risk losing **\$11,351,542,078** of its **\$66,383,287,003** GDP on the Financial Action Task Force (FATF) grey list. Netsweeper helps countries improve and protect their FDI by combating corruption, reducing gambling, enforcing policies, protecting vulnerable citizens, and more.

As of July 2024 DR Congo is on the FATF grey list
All amounts in USD based on 2023 statistics.

Capital Inflows (CI)

Loss: **\$5,045,129,812**

Grey-listing has a large, significant negative effect on capital inflows, suggesting an average 7.6% decline of a country's GDP.

Foreign Direct Investment Inflows (FDII)

Loss: **\$1,991,498,610**

Grey-listing causes foreign direct investment to decline by an average of 3% of GDP.

Portfolio Inflows (PI)

Loss: **\$1,925,115,323**

Portfolio inflows, once grey listed, result in an average decline of 2.9% of GDP.

https://www.netsweeper.com/fatf-grey-list-calculator?country=COD_DR+Congo

Get off Keep off the FATF Grey/Black List

The DRC has made a high-level political commitment to strengthen its AML/CFT system, and is taking steps to improve interagency coordination and cooperation.

Key areas of focus for the DRC include:

- **Developing and implementing a risk-based supervision plan:**
 - This involves assessing and managing the risks of money laundering and terrorist financing within the financial system. **Netsweeper blocks unlicensed Gambling and illegal Scams and financial Crimes.**
- **Strengthening the capacity of the Financial Intelligence Unit (FIU):**
 - The FIU needs to be able to conduct effective operational and strategic analysis of suspicious financial transactions. **Netsweeper's NS Clear provides unique visibility to On Line Sales Transactions. Netsweeper can effectively block suspicious payment portals**
- **Strengthening law enforcement and judicial capabilities:**
 - This includes improving the ability to investigate and prosecute money laundering and terrorist financing cases. **Netsweeper's Terrorist logging and IP identification provides Time/Date Stamp Evidence of Suspicious On Line Activity.**

Get off Keep off the FATF Grey/Backlist

- **Demonstrating effective implementation of measures related to terrorist financing and proliferation financing:**
- This involves ensuring that the country's laws and regulations are effectively enforced to prevent and combat these threats. **Netsweeper effectively blocks activity related to Terrorist financing and proliferation financing.**

The FATF also notes that the DRC should continue to work with its GABAC partner (Action Group against Money Laundering in Central Africa) to implement its action plan and address its strategic deficiencies. **Add the Netsweeper Solution tools to the Action Group. GABAC**

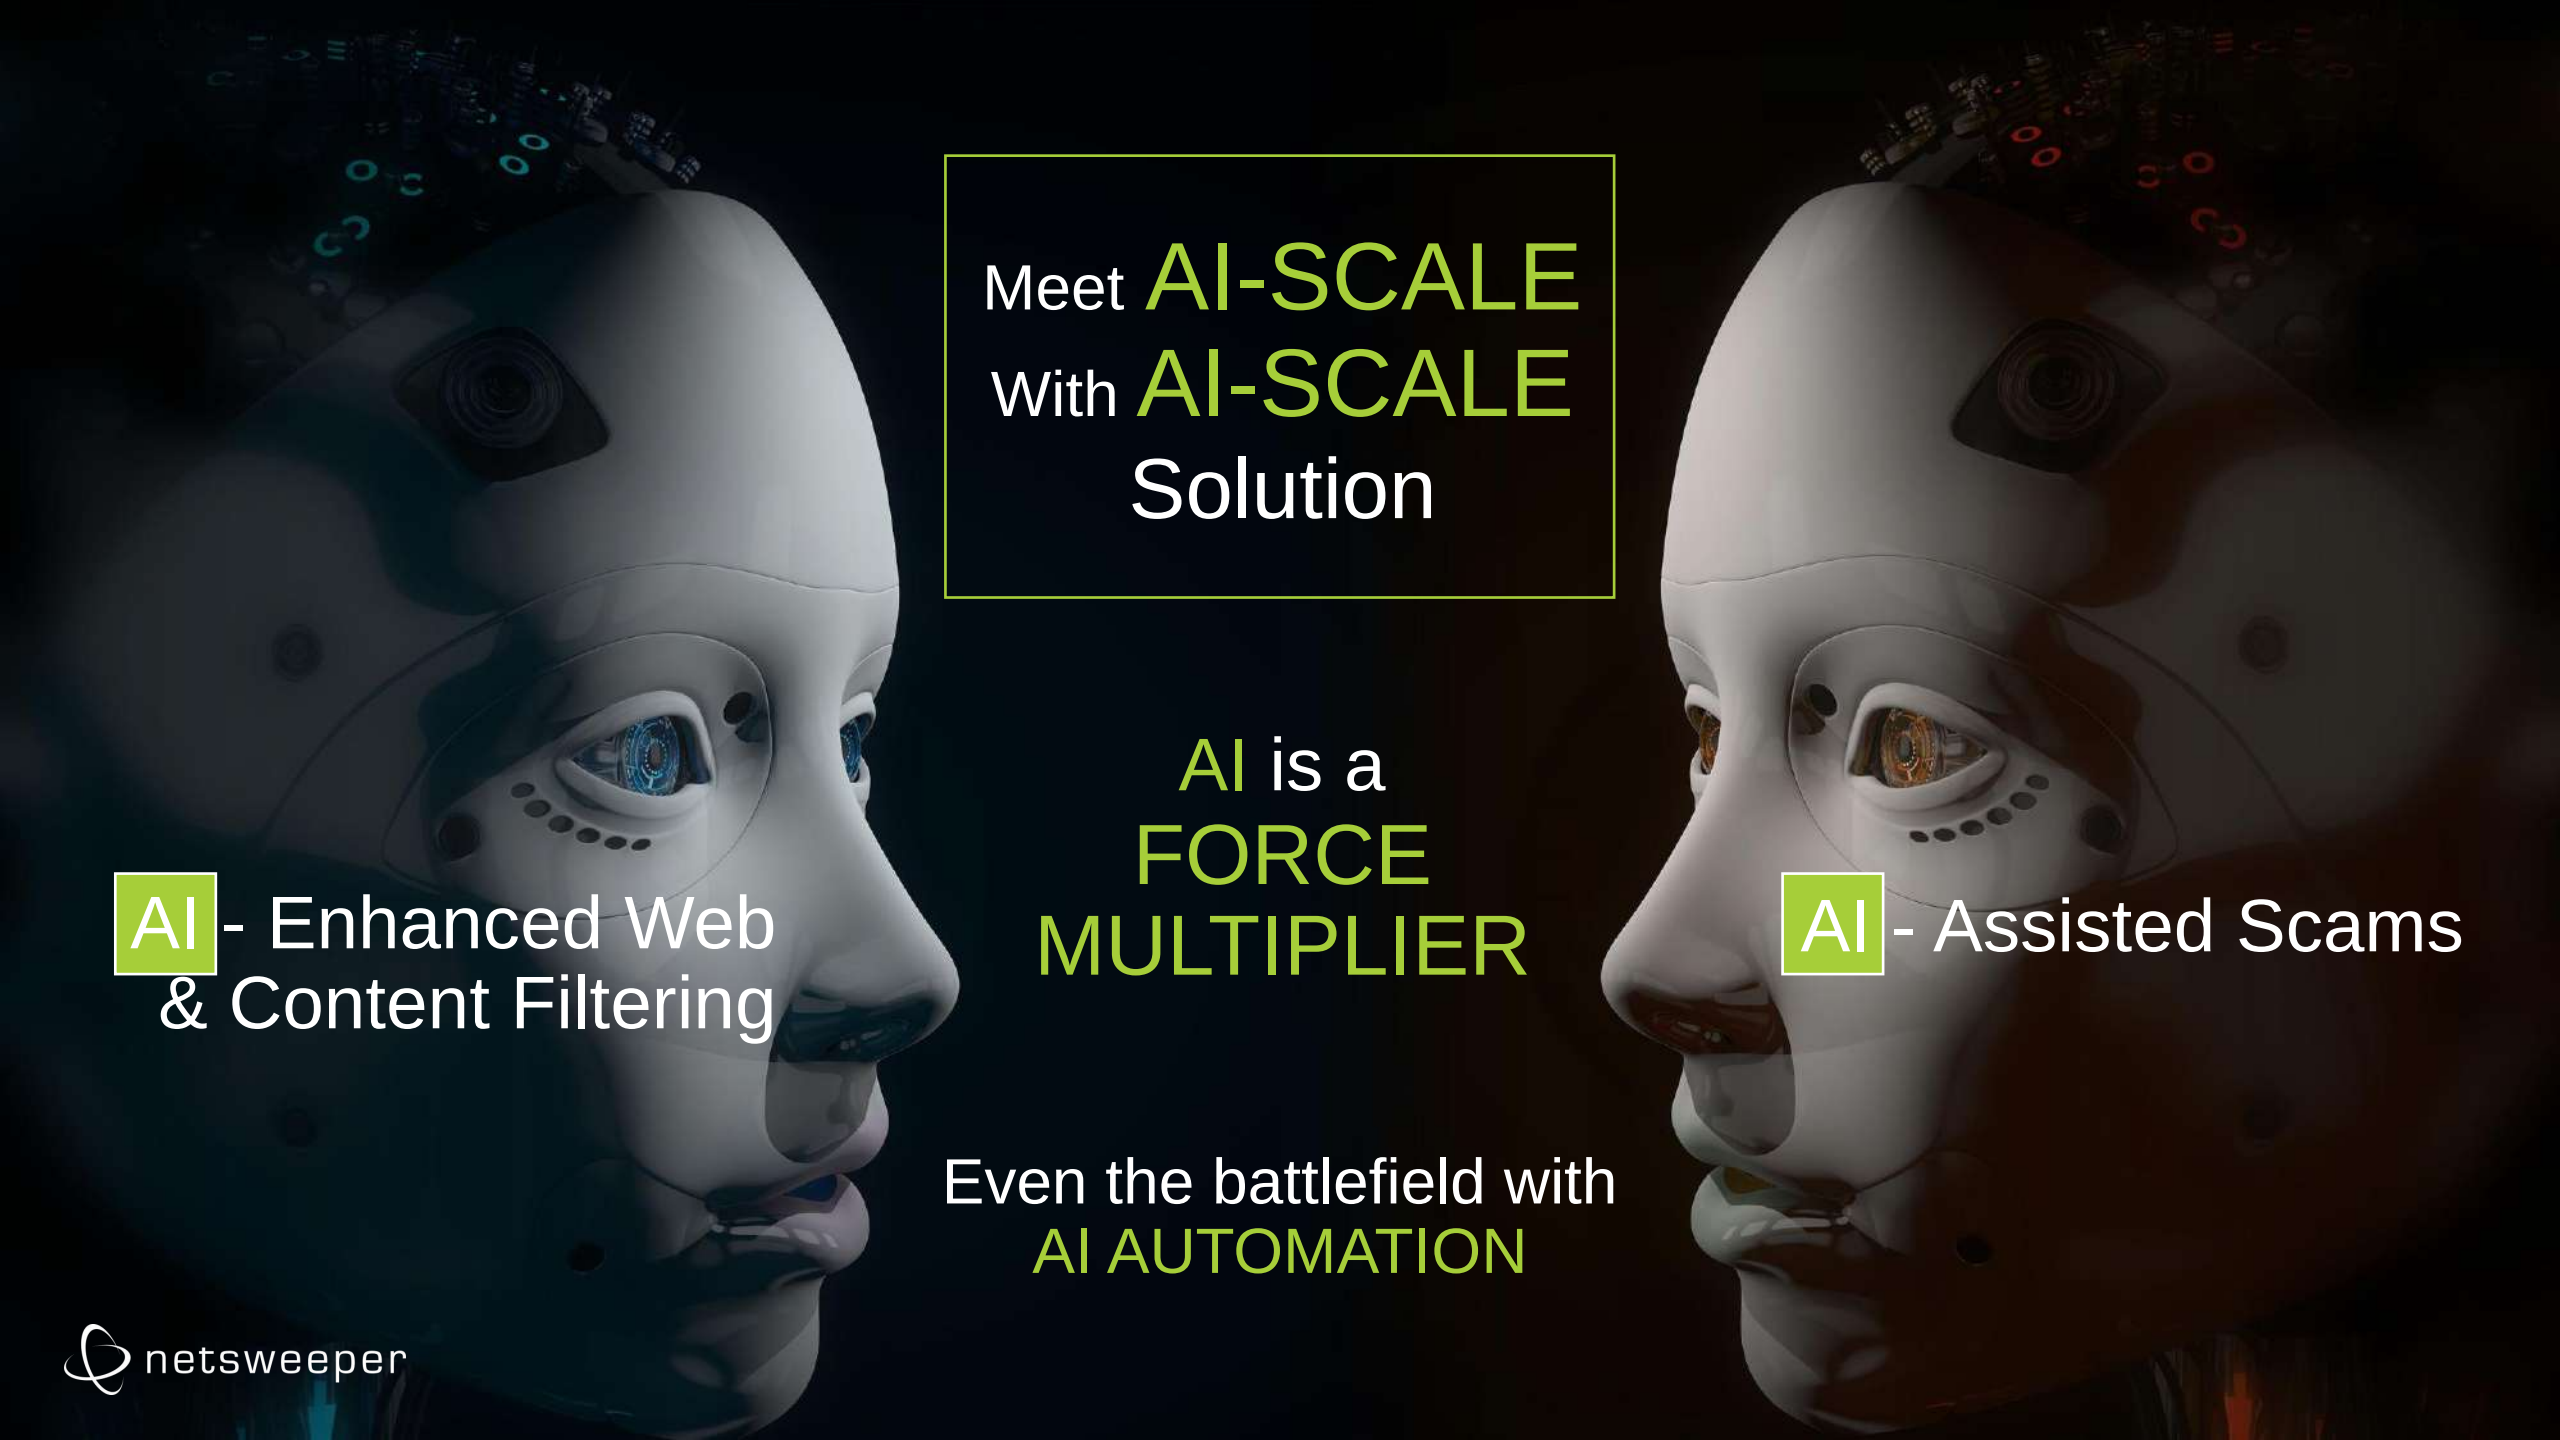

- In summary, the DRC is actively working to improve its AML/CFT regime, and the FATF is monitoring its progress in implementing its action plan to address identified deficiencies. **The Netsweeper Anti Money Laundering, Anti Terrorist investigation, Effective shut down of Sites of Internet and evidence of Time/Date Stamp Greatly Improve Congo DRC's AML/CFT regime.**

AI-Assisted Scams

In AI-assisted scams, artificial intelligence helps the scammer commit the scam. In general AI scams, the hacker is leveraging the popularity and zeitgeisty nature of AI as a topic to intrigue curious targets, such as a fake ChatGPT app scam.

- **AI-Assisted Phishing Scams**
- **AI Voice Cloning Scams**
- Social Media AI Scams
- Fake ChatGPT Apps
- Fake ChatGPT Websites
- AI Investment Scams
- **DeepFakes** (AI-created synthetic content)

**WHY ISPS WILL
ACCEPT US?**

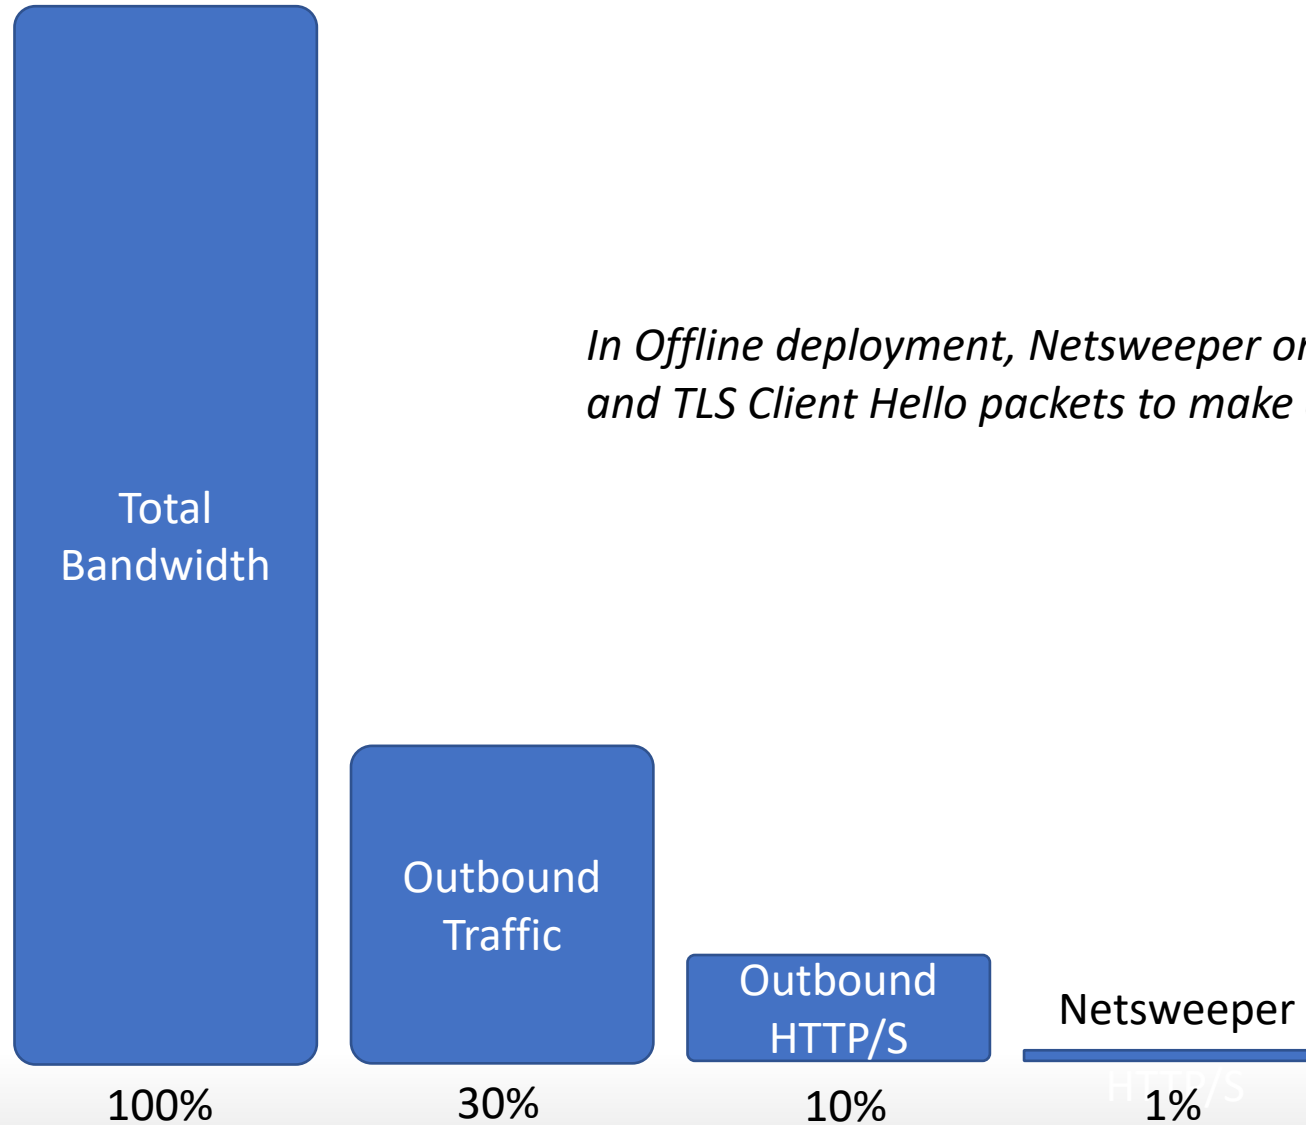

We are zero latency
and zero downtime –
demonstrated

Zero Latency & Zero Risk Out of Band (Offline) Deployment

- Netsweeper's NS Enforce platform is a Real-Time, High Performance Passive Inspection system designed not to interfere with existing networks
- Data traffic as it passes through the service provider network completely unhindered, with zero performance impact or delay

Out-Of-Band - Efficiency

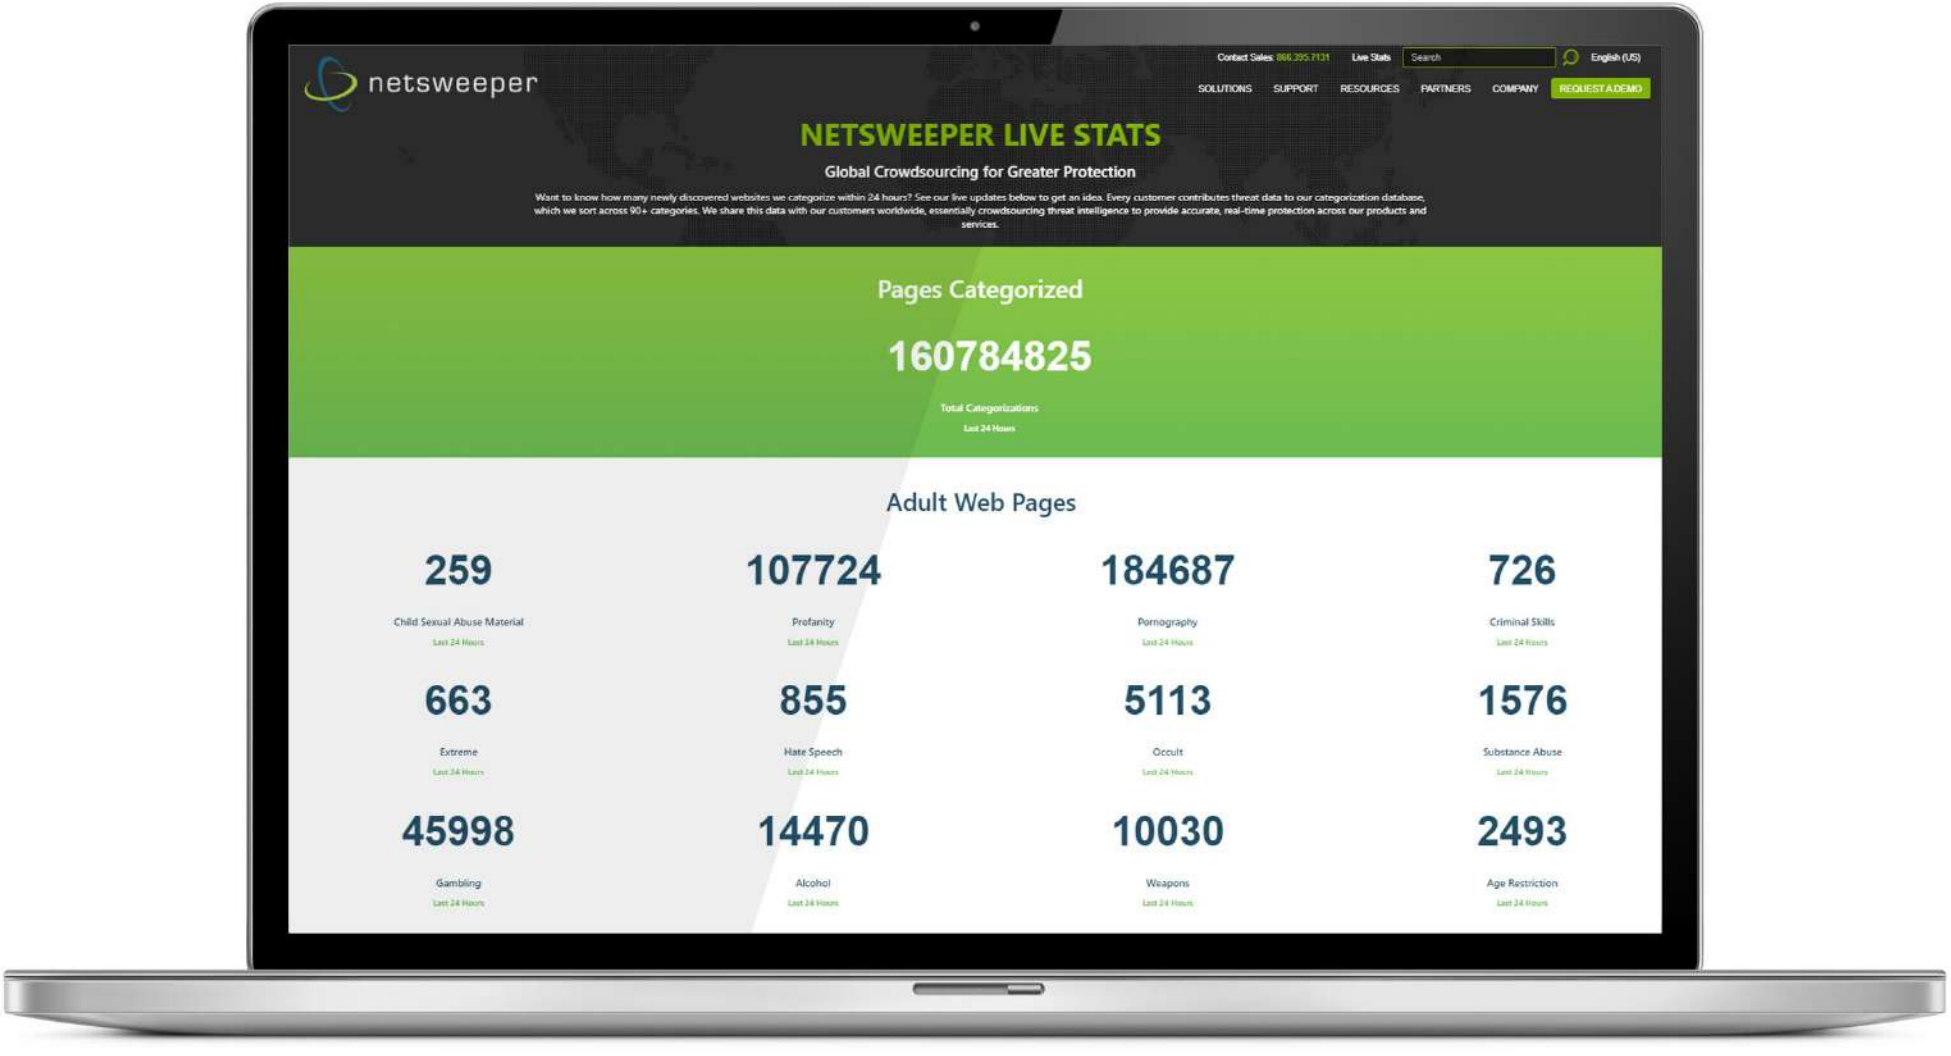

In Offline deployment, Netsweeper only need to inspect the HTTP GET and TLS Client Hello packets to make a policy decision

Discussion Points

- Transform, Prepare for Digital Exponential growth, Enforce the Digital Laws/Rules, Congo DRC
- Open Up Investment (off Backlist), Replace China, Create Jobs, Minerals Fund opportunity
- The Internet is not about Congo DRC, USA, EU. It's the WWW.
- Technology tools Like Netsweeper provide Transformational last mile execution and enforcement.
- Locally supported Central management services for the country By Local Partner Supported by Team Netsweeper.
- Proven for over 25 years. ISP's host the servers.
- NS Clear Collects VAT for Mobile Money/On-line Purchases/Services
- Manage Unlicensed Gambling sites/Legitimize, Fees, % Revenues, Corporate Tax
- Get / Keep Congo DRC off the Black/Grey List FATF
- Cyber Intelligence Tools for Investigation Terrorists, Cases of Interest.

ISP Phone Scams	Fake ISP Site/buy phones/payment portal	Block Fake Web site / Any payment Log in site

Out-Of-Band - Scalable & Resilient

- Use passive network TAP and network packet brokers (NPB) to avoid using up the capacity of router with SPAN port
- For VAS deployment, DHCP or GGSN can assign a specific IP address pool to filtered users then the NPB can limit traffic from relevant IP to send to Netsweeper.
- NPB sends load-balanced traffic to N+1 Netsweeper Policy Servers for resiliency
- To scale up, add more Policy Servers as traffic grows

Out-Of-Band - HA & Redundancy

- For HA & redundancy, we propose a minimum of 2 servers
